A Family Business With The Same Mission Through 3 Generations

Arai is not your typical helmet company; in fact it wouldn't be typical even if it wasn't a helmet company. First, in an industry of large, publicly-held competitors, Arai is a comparatively small, family operation, owned by the Arai family through three generations. Hirotaké Arai, a talented rider in his own right and, ironically, a custom hat maker by trade, founded it in 1937 in Ohmiya, Japan. Today, the second and third generations are represented by Hirotaké's son, Michio "Mitch" Arai, the current president, and his son, Akihito, known as "Aki."

Ask Mitch Arai what he thinks makes his company unique, and he takes its multi-generation history to a different level: "We have had the same goal, the same mission, throughout these three generations. Nobody else can have that because public companies change owners and goals." Yet it's not this single mission per-se that makes him proud, it's what the mission is: "Our focus has always been the rider. Other companies might say that, but our history shows that all Arai innovations have been created to give the rider better protection, comfort and fit … These innovations do not all make news and they are not all fashionable, but this is not our goal. The goal is doing our very best for the rider … Arai is a conservative company. We say the job of a motorcycle helmet has not changed – protection against impact. You can add things to it as long as you never forget those basics. … Every Arai worker knows that a rider is depending on them to do their best. This understanding, and the decades it has existed, has resulted in a very distinctive Arai culture here, built around the goal. We do not ask workers to be loyal to Arai, we ask them to be loyal to our goal: a better helmet for riders. Please remember, we came from a rider, and that rider was my father. It is our family name on the helmet. How could we do less than our best?"

All Arai helmets are built to one standard, not to price points, no low-end to high-end. To those who say Arai's are expensive, the response is that it takes so much time and effort to build each one that "the cost to build determines the cost to sell." The helmets are handmade. Standards and tolerances are so strict that every single Arai shell must pass at least three inspections, including shell thickness, before it's even assembled. "A rider must be able to trust what is under Arai paint."

There are only 15 men in the entire company qualified to hand-make an Arai helmet shell. That is 15 for the worldwide market. Clearly, this is not a company out to flood the market with "product." And these 15 shell experts do not just build motorcycle helmet shells. They are also responsible for all of Arai's auto-racing shells. It is one thing, they say, to build a good motorcycle helmet. But to possess a capability so advanced that you can not only compete in Formula-1, but dominate the grid – and have four of the last six world champions, including the current one – says more than words can about the company's obsession with quality above all. Even more telling, every F-1 driver wears an Arai for free – no sponsorship money.

New Arai helmet designs are sculpted by hand, not computers. "Computers are very good," says Mr. Arai. "But computers solve mathematical problems. People solve human problems. Our helmets are designed for humans." Arai stays with its side-pod shield system because they feel it intrudes less into the shell shape than the newer podless systems, letting the shell "do its job better in the rapid dispersal and dissipation of impact energy via a smoother shell surface."

"We really hope people can understand it's not just about more sales around here. Mr. Arai doesn't care about fashion; if the feeling is that something isn't true to our core culture's emphasis on the best rider protection, comfort, and fit we can build, they just won't do it. Podless systems are much easier and cheaper to build than ours is. We know our faceshield system isn't intuitive. But intuitive's not the point. Pod vs. podless isn't the point. Rider protection is. Has been since the beginning."

THE ARAI FIT: WHY IT'S LIKE NO OTHER

AT ARAI, THERE IS A VERY BIG DIFFERENCE IN OUR COMFORT AND FIT BECAUSE WE PUT SO MUCH MORE EMPHASIS ON OUR COMFORT AND FIT.

HELMET FITMENT SPECIFICATIONS

Arai is the only company offering multiple interior-fit shapes to better address the infinite variety of riders' head shapes and sizes.

No one pays more attention to the subtle variations and infinite possibilities of the human head shape than Arai. Why? Because it's the secret to getting the best comfort and fit. And Arai is nothing short of obsessed with putting you into the best fitting, most comfortable helmet possible – because that's who we are.

The Importance of a Helmet's Interior Shape: Because head shape is as important as head size in getting "the perfect fit."

Step One: Finding the Right Size and Fit

The first step is understanding how a helmet is supposed to fit, that it's not like your favorite baseball cap. A helmet is an **ENERGY MANAGEMENT SYSTEM** whose number-one job is to manage the energy of an impact it can't predict. (Pretty paint and graphics are just there to make it look good.)

Start: Get your head measured to get an idea of where to start. The images here show the proper placement of a measuring tape to get the right tape-placement for the most accurate measurement.

Your Face: Do not be concerned at first with getting the helmet to fit over your face. (Facial-fit problems mostly occur in riders with thicker cheeks or jaws. We find many such riders wearing helmets up to three sizes too big. The problem occurs when you can't get the helmet past your cheeks or jaws, you think "it's too small," and you reach for a bigger size. But your brain's not in your face.) The helmet must fit your head. That's why it's important to focus on your head size (crown fit) measurement first. How? With Arai's cheekpads.

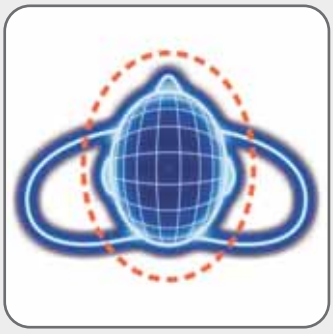
PROPER CROWN FIT AND CHEEKPADS:

Snug is good: For the most comfort, the interior must fit snugly all around the crown of your head. (The crown is the area contacted by a baseball cap's band, for example.) You should feel a firm, even pressure at all the contact points around the interior perimeter, with no tight pressure points that could become uncomfortable in the future.

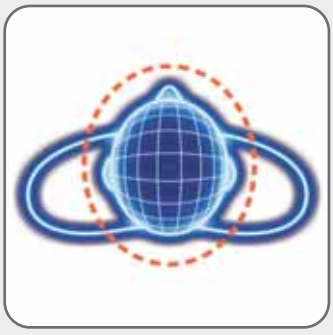
Try on different sizes and interior fit shapes until you get the desired crown fit. (If you have that broad facial-structure situation, remove the cheekpads first to keep them from interfering with getting the helmet on. Then try on helmet sizes until you get the proper crown fit.) Once the crown fit is good, Arai's optional cheekpad thicknesses—and our exclusive new 5 mm peel-away micro-fit cheekpad layers—can fine tune your personal fit to a degree you never thought possible. Just about the closest you can come to wearing a helmet custom fit for your individual face — as only Arai can do it.

Don't guess size: Try the helmet on for a while before you buy it. Don't think you know your shape or size — make sure. Measuring gets you halfway there; a test fit confirms it. Having a helmet of the same brand, model, and size - even an Arai - may not fit like a current model or size because the evolution of the design process can affect the current size and shape.

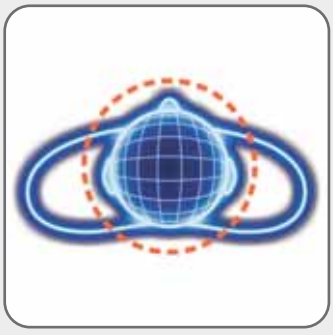
Determining Your Arai Interior-Shape Fit



Generally, our North American market interiors have an oval shape orientation (somewhat longer front-to-back, narrower side to side) because most of our heads tend to be more oblong than round. Our different Arai models vary slightly based on that general Oval shape to accommodate a much wider fit range.



LONGER OVAL (Longer front-to-back, more narrow side-to-side). This fit offers additional forehead room for those who find that most helmets have pressure points in the forehead.



INTERMEDIATE OVAL (Not as long front-to-back as the Longer Oval). This fit shape lies in the middle area between heads than the more-pronounced Longer Ovals or more evenly-shaped Rounder Ovals.

ROUNDER OVAL (Even a little shorter front-to-back and a little wider side-to-side). Although still an oval, this shape is for riders whose head shape tends to be a bit rounder than that of a strict Intermediate Oval fit.

REMEMBER, ARAI MAKES DIFFERENT SHAPE INTERIORS, BUT WHICH ONE IS BEST FOR YOU DEPENDS ON WHICH ONE FITS YOU THE BEST. THE ONLY WAY TO DETERMINE THAT IS TO TRY THEM ALL ON.

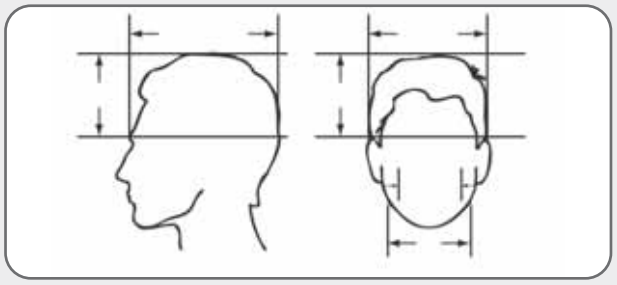
Lastly, we want to mention the role of Measured fit, even though head shape is equally (if not more) important to the best fit. You'll find an excellent video on getting the right fit on our website at www.araiamericas.com/default.aspx?pageid=92.

THE ARAI FIT: WHY IT'S LIKE NO OTHER

HELMET FIT: HOW HARD CAN IT BE

If helmet companies made helmets individually for every rider, fit would be much less of a problem. They take the measurements for each face and that's it. Perfect.

The problem is that helmet manufacturers are making helmets to fit a world of people — literally. A world of shapes, angles, widths, bulges, recesses, etc. (Snowflakes aren't the only things where no two are alike.)



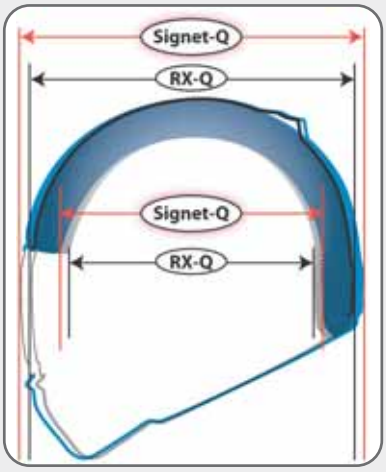
The difference in how helmets are made to fit the world of people is what separates Arai from every other manufacturer.

Helmet making is mostly a function of economics. (Isn't everything?) If you're a lower-end manufacturer some things just aren't economically feasible — like dealing with all those head- shape variables. So you cut costs by making just one interior shape for all your models. It doesn't do much for the comfort and fit of the world of head shapes, but you're selling a lower-priced product, so it's good enough.

Several decades ago Arai realized that the idea of good enough wasn't what drove us.

Arai believed there are discerning enthusiasts with the riding experience and awareness to appreciate the innumerable benefits of a better-made, better-fitting helmet for long stretches in the saddle. (Arai riders typically ride further than from road house to road house.) And while it was accepted that we could never build the perfect fitting helmet for everyone, that didn't mean we couldn't try. No matter how time and effort-intensive, and costly, it was. We had a mission. So for more than three decades, Arai has pioneered different shapes and even different proportions within those shapes in our various helmet models, working to offer a better fit for more people.

A Case in Point: The Arai RX-Q and new Signet-Q models



While over the years we've had many different shapes, and various proportions within those shapes, we constantly measure heads to learn where we can improve. A longstanding successful shape has been the Intermediate Oval (I/O), currently found in our RX-Q model.

We recently measured the head shapes of nearly 750 consumers across the U.S.! It provided us with the first-hand information that led to the development of our latest Long Oval (L/O) helmet, the Signet-Q. We say the latest Long Oval because we don't simply mimic the past, we blend what worked before with what we've learned since, to produce a new shape to hopefully fit more people. We used the Signet model name, which was used years ago and was well known for its very long narrow interior shape, but updated the shape and fit to make sure that this new Signet comes with a new L/O shape that we feel addresses a larger segment of the US market.

Because we have more than one interior shape/fit, riders often ask us to define those shapes and proportions so that they can more easily determine the best helmet for them. And while we have to define these parameters in order to produce our helmets, we don't provide those details because the decision isn't based solely on dimensions.

A helmet needs to be tried on in order to determine a proper fit. With an Arai helmet, regardless of your presumed head shape, a side-by-side test fit, like an RX-Q against a Signet-Q, will give an apples-to-apples comparison to find your best fit. And, not surprisingly, in some cases your "perfect" fit isn't the interior shape you thought, or were told you were.

ARAI'S LATEST "PERFECT FIT" INNOVATION: MICRO-FITTING CHEEK AND SIDE/TEMPLE PADS

Even after laboring over different shapes and dimensions, we recognize there is still an infinite number of shapes that fall between our sizes and interior fits. So Arai takes fitting to an even greater level by incorporating micro-fit pads that allow you to give yourself a little extra room if needed, without having to purchase extra interior options. This allows you to stay in your proper size rather than the traditional solution of moving up a size, which decreases comfort and performance while increasing noise and movement.

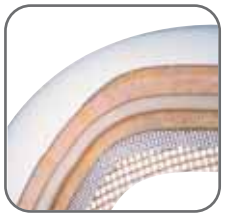
Nothing takes the place of an in-person test fit of the actual helmet you're going to buy. You owe it to yourself to make an educated decision, to try on every helmet, not just an Arai, and then make the best decision for you.

Currently our two main fit packages - RX-Q (I/O) and Signet-Q (L/O) — provide suitably different and unique solutions for the extremes of head shapes, while offering new micro-fitting options to help a few more of the extremes and in-betweens find a better fit.

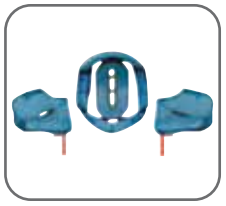
We constantly encourage Arai dealers to stock a size selection of all Arai models to provide a direct comparison opportunity for their customers. As a consumer, we encourage you to seek out one of those dealers and/or encourage your dealer to make the effort.

ARAI HELMET FEATURES

Brow-Vent Channeling
Brow-vent inner ducts redirect incoming air to the temples instead of the forehead, and around the ear area (missed by many helmet ventilation systems). The stale air is then extracted out the side exhaust cowls. The airflow over the temple artery reportedly also helps cool the blood flow to the brain area. This simple re-purposing of two existing vent features greatly improves helmet performance and rider comfort.



Shell Construction
Arai's decades of experience, research, testing, comparison and evaluation has concluded that fiberglass-based construction is ideal for performing a helmet shell's main job – dispersing impact energy over the widest area through strength, structural integrity and impact flexibility (although Arai's R&D study and testing of alternative shell technologies is always ongoing). The shell utilizes our proprietary aerospace fiberglass to achieve an exceptionally strong, flexible, yet lightweight shell.



Removable, Washable Liner
Another Arai innovation first introduced in the late '80s, our fully removable, washable, and replaceable interior comfort-liner components also permit micro-fitting of a helmet in between- size scenarios.

LRS Shield Removal
Watch racers Nicky Hayden and Kenny Roberts, Jr. swap Arai faceshields on video while wearing their helmets and you'll see for yourself how easy Arai's LRS tool-less system really is.

Patented Dual-Pivot Chinvent
This easy-to-operate, two-position dual-pivot hinge mechanism allows for increased chinvent airflow capacity to two areas: the first position directs air to the face through an activated carbon-coated foam filter; the second sends the air to the faceshield to aid de-fogging.

Unique Cheekpad Design
The cheekpad design allows for the pads to be removed and cleaned more easily.
They can also be replaced with one of our optional pads of different thicknesses for a more custom fit (another Arai innovation that's now copied by many other helmet makers). "Customized" cheekpads with a finer made-just-for-you fit are another result of the decades of commitment to every nuance of rider comfort by Arai people.

Extreme peripheral view
Arai's 10 mm wider eyeport (5 mm each side) enhances peripheral vision for a better view of the world around you. Also gives you a feeling of "openness" inside the helmet. It uses Arai's SAI faceshield that fits so flush it almost looks like a continuation of the shell.

One-Piece Liner
Arai's EPS liner is like no other, comprised of several material densities molded into a single piece. Arai pioneered this technology more than 20 years ago and is still, to our knowledge, the only helmet offering this liner and its unique benefit: the direct-fused contact area that each EPS cell shares with its neighboring cells creates a mutual support. As one is crushed under impact, the surrounding cells assist with the energy absorption. (Liner pieces that are simply fitted or glued together cannot rely on such a high-level support bond.)

ARAI'S LATEST "PERFECT FIT"

Arai's Latest "Perfect Fit" Innovation: Microfitting Cheek And Side/temple Pads

Even after laboring over different shapes and dimensions, we recognize there is still an infinite number of shapes that fall between our sizes and interior fits. So Arai takes fitting to an even greater level by incorporating micro-fit pads that allow you to give yourself a little extra room if needed, without having to purchase extra interior options. This allows you to stay in your proper size rather than the traditional solution of moving up a size, which decreases comfort and performance while increasing noise and movement.

Nothing takes the place of an in-person test fit of the actual helmet you're going to buy. You owe it to yourself to make an educated decision, to try on every helmet, not just an Arai, and then make the best decision for you.

Currently our two main fit packages - RX-Q (I/O) and Signet-Q (L/O) - provide suitably different and unique solutions for the extremes of head shapes, while offering new micro-fitting options to help a few more of the extremes and in-betweens find a better fit.

We constantly encourage Arai dealers to stock a size selection of all Arai models to provide a direct comparison opportunity for their customers. As a consumer, we encourage you to seek out one of those dealers and/or encourage your dealer to make the effort.

INTERIOR LINERS AND CHEEKPADS

Optional interior liners and cheekpads of different thicknesses allow you to custom fit your Arai helmet. To order a liner of a different thickness, start with the Lining Code that matches your helmet size, than specify the desired thickness. For example, an optional 5mm liner for a large helmet would be specified as a "**III-5mm**" liner.

ARAI HELMET FEATURES

MODELS AT A GLANCE

Features & Benefits	CORSAIR-V	RX-Q	SIGNET-Q	DEFIANT	VECTOR 2	CT-Z	XC	XD4	VX-PRO3
PB-SNC (Peripheral Belting-Structural Net Composite) The Peripheral Belt extends across the forehead area of the shell above the eye opening, enhancing the structural integrity while maintaining flexibility, low weight and shell size. Incorporated into Arai's most advanced shell, SNC uses proprietary net strands that bond shell layers even more rigidly allowing for the shell weight to be almost 3 ounces less and provide a lower center of gravity.	●								
ScLc (Super Complex Laminate Construction) 40% stronger than standard fiberglass in extension and bending resistance. Commonly referred to as F.A.S.T. (Fiberglass Aerospace Shell Technology) construction due to its development heritage.		●	●	●		●	●		
cLc (Complex Laminate Construction) Contains a specially designed felt that is sandwiched between the two layers of Super Fiber Laminate. The felt acts as a reinforcement layer without adding significantly to the weight of the helmet.					●			●	●
Hyper-Ridge The reinforcement band circles the bottom of the shell adding strength and lowering the helmet's center of gravity.						●	●		●
Outwards Flaring Hyper-Ridge Flares out to provide a larger opening so that the helmet is easier to get on and off. The reinforcement band circles the bottom of the shell adding strength and lowering the helmet's center of gravity.	●	●	●	●	●				
Extreme Peripheral View 10mm wider eyeport (5mm each side) greatly enhancing peripheral view.	●	●	●	●	●				
LRS Shield Removal Allows for shield changing without tools or removal of the sidepods.	●	●	●	●	●		●		
De-Mist Lock Faceshield tab pushes forward to open the shield and help clear any fog that may appear.	●	●	●	●	●				
Pull Down Air Spoilers Helps minimize wind noise. Also aids with the extraction of the hot air from the face area.	●	●	●	●				●	
Cowl Vent Design Exhausts heat more efficiently. The vents are sculpted into the rear shell shape and work in concert with the AirWing to greatly add lateral helmet stability at speed (Arai test riders reported this benefit is most noticeable when popping up into the airflow when braking).	●	●	●	●		●	●	●	●
Brow Vent Channeling Ventilation Gives you more cooling air in the forehead area without holes in the critical forehead area of the shell or impact absorbing liner.	●	●	●	●	●	●	●	●	
Advanced Intake/Exhaust Ventilation Provides a more directed airflow and the exhaust vents are designed to draw a more significant volume of air from the helmet's interior.	●	●	●	●	●	●	●	●	●
Rear Neck Exhaust Duct Is a perforated duct at the base of the lining which aids in the removal of stale air from the helmet interior.	●	●	●	●	●	●	●	●	●
FFS (Free Flow System) Helps reduce wind noise and turbulence while increasing the exhaust of hot air.	●	●	●	●	●				
IR Front Spoiler Edge Trim creates a stabilzing down force reducing wind noise between the shoulder and the bottom of the helmet.				●					
Chin Vent Shutter Is a closable gate behind the cnter vent that allows the vent to be closed for extreme weather condition.								●	●
DF-M Top Mounted Diffuser Vents Medium sized diffusers that can easiy be removed or replaced due to damage asa result of harsh off-road environments.								●	●
DF Diffuser has enhanced air inlets to increase airflow efficiency. The middle-intake slot creates an accelerated venturi effect for faster venting of stale air. The center top vent has been re-sculpted to provide more air intake; it also has a larger toggle.	●					●			
IC4 Duct Intake vents have a slide-gate closure that seals more completely when closed.				●					
ACR4 Duct Allows air to pass over and through the vent, accelerating exhasut flow when open and reducing drag when closed.				●					
Removable/Replaceable Cheek Pads Gives you a more custom fit by enabling you to replace standard sizes with optional sizes.							●		
FCS® Cheek Pad System A spring support that adds just the right amount of pressure when worn and releases to create extra room when the helmet is removed. The 5mm peel-away micro fit layer offers unparalleled custom fitting.	●	●	●	●	●	●		●	●
Emergency Release Cheek Pads Allow for easier access to an injured rider by sliding out via integrated pull tabs built into the underside of the cheek pad.	●	●	●					●	●
Water Repellant Cheek Pads Advanced material on the cheek pads keep the exposed areas of the cheekpads from absorbing water in wet conditions.				●					
Sound Absorbing Ear Pad Foam A layer of foam in the ear pocket to help block assorted noises from reaching your ears.	●	●	●	●	●	●	●	●	●
Removable/Replaceable Neck Roll Easily removes and re-installs for thorough washing or replacement if damaged.	●	●	●	●	●	●			

ARAI® CORSAIR V RC

- Eleven carefully applied layers in each outer shell
- Shell is mixture of aircraft quality premium carbon fiber coupled with Arai's own resin plus Zylon reinforcement
- Features structural net composite (SNC) as one of the layers
- Takes 1 entire day to produce 1 shell
- Features Arai's own Peripherally Belted construction
- EPS liner is a 1 piece liner with multiple densities
- Takes standard SAI face shield
- Side shield holders are opaque to view the inner workings of the shield mechanism
- Improved diffuser ventilation
- Grey, removable Dri-Cool interior
- Meets or exceeds **D.O.T.** and **Snell** 2010 standards
- **Special order only**
- **Please allow 4 to 6 weeks for delivery**

Race Carbon Fiber

ARAI® CORSAIR V

- Hyper-Ridge around the bottom enhances shell strength while providing a larger bottom opening
- Larger bottom opening promotes ease of putting on and taking off the helmet
- Peripheral belting across the forehead area of the shell enhances structural integrity while maintaining flexibility, low weight and minimal shell size
- Larger upper vent tabs make operating the vents easier even with thick winter gloves
- Arai "SAI" shield with Super AdSis shield system
- "SAI" shield is 5mm longer on each side and provides wider field of view
- "SAI" shield and base plates exclusive to Corsair V
- Latest generation of Dry Cool liner has a silver-grey color
- Rear mounting snaps are slightly re-positioned for exclusivity to the Corsair V
- Neck roll is removable and has additional exhaust channels to remove interior heat
- Cheek pads have the exclusive Emergency Release Tab feature
- Side exhaust cowls exhaust heat as well as add lateral stability at speed
- Enhanced air inlets of the DF10 diffuser increase airflow efficiency
- Brow vents now duct air into the temple area and out the side vents for maximum cooling
- Exclusive Airwing provides unprecedented aerodynamic performance with 5 distinct positions

ARAI® DEFIANT NEW

- Aggressive new styling on the outside
- Same attention to safety and comfort on the inside
- Organic shell shape for superb energy management
- Comes equipped with **SAI MAX VISION** "Brow Vent" Pinlock ready shield and Pinlock insert for larger fog free viewing area
- New IC-4 upper intake vents seal more completely when closed
- New ACR-4 flow thru exhaust vent allows greater air flow when open and reduces drag when closed
- FCS R (Facial Contour Support) cheek pad design has 5mm peel away micro fit layer for greater personal fit
- Cheek pads feature contoured shape, multiple density foam layer supported by a patented spring
- Intermediate oval interior shape
- New water repellant material along bottom edge
- Pull down spoiler works with new flared bottom to increase helmet stability
- Meets or exceeds **D.O.T.** and **Snell** standards

ARAI® SIGNET-Q

- Slightly longer front to back length than RX-Q for true "Long Oval" fit
- Larger eyeport opening as found on Corsair V, RX-Q and Vector-2
- Comes equipped with **SAI MAX VISION** "Brow Vent" Pinlock ready shield and Pinlock insert for larger fog free viewing area
- Interior liner comes with 5mm "peel-away pads" to allow micro-fit without purchasing additional liners
- New "FCS" (Facial Contour Support) cheek pads adds innovative and exclusive spring support for added comfort and custom fit
- FCS cheek pads also feature the 5 MM peel-away micro fit feature
- Uniquely-designed lower Hyper-Ridge circles the lower shell and provides additional strength
- Has a removable neck roll and Emergency Cheek Pad Removal System
- Meets or exceeds **D.O.T.** and **Snell** 2010 standards

ARAI® CT-Z

- Intermediate Oval shape
- Additional protection provided by extending the jaw piece 1 3/16" forward compared to previous traditional open face helmets
- Adjustable visor offers protection from the sun
- Dual Pivot shield flips up and tucks up under the visor at a low angle for reduced drag
- Upper vent system borrows directly from the Corsair V, improving air flow and helmet stability
- DF-11 diffusers have larger vent toggles for use with gloves
- Fixed AIR-WING® reduces lifting while providing additional stability at highway speeds
- New FCS™ cheekpads offer more support over a wider area for stability and comfort
- FCS pads feature removable covers and 5MM peel away to microfit your helmet.
- Fully removable Dry-Cool® liner with removable surface pads on both sides of the headliner for custom fitting
- Vented neck roll to maximize air flow around the neck area and remove heat from the interior
- Meets or exceeds **Snell** and **D.O.T.** standards

ARAI® XC

- Additional protection provided by extending the jaw piece 1 3/16" forward compared to previous traditional open face helmets
- Front and rear vents are taken directly from the RX-Q
- Side Cowl exhausts complete the ventilation upgrade
- Fully removable Dry-Cool (Reg) liner
- Vented Neck Roll extracts more heat build up from the interior
- Thinner side pods provide a more aerodynamic shape
- LRS levers assist in shield removal
- Multi Density EPS liner
- Meets or exceeds **Snell** and **D.O.T.** standards

Smoked and tinted shields are designed for daytime use only and are not recommended for nighttime use.

ARAI® XD4

- High-flow peak channels air directly into the front vents
- Twin-cam Shield Pivot System allows the face shield to operate fully under a peak that can be lowered for better aerodynamics. Can be configured with shield and peak, peak only (for use with goggles) or shield only*
- Fully Removable/Replaceable and washable liner with optional sizes available for a custom fit
- 4 top vents. Dual Intake/Dual Exhaust Ventilation–dual IC-3 top intake vents and Double Delta bridged exhaust vents designed to draw significant volumes of air from helmet interior
- CLC (Complex Laminate Construction) shell–fiberglass composite is stronger and lighter–allows use of softer, less-dense liner materials inside for increased rider comfort
- Efficient chinbar vent (with interior and exterior controls) flows fresh air to the mouth area or across the shield interior to help prevent fogging
- Large chinbar side exhaust vents draw out additional hot air
- Meets or exceeds **Snell** and **D.O.T.** standards
- The peak/visor supplied is not suitable for high-speed use where air striking a side or main surface of the peak may cause difficulty in returning the head to a forward and/or level position

WARRIOR DOG FOUNDATION

Tucker Rocky/Biker's Choice® are proud to be a corporate sponsor of the Warrior Dog Foundation. Founded by Mike Ritland, who fought as a Navy Seal in Operation Iraqi Freedom, with the sole purpose of giving back to the Navy Seals and Special Operation Forces K-9's in the combat environment and showcase the level of sacrifice these dogs give in the support of our troops. They care for each retired K-9 with dignity and grace, including both mental and physical rehabilitation for the rest of their lives.

NOLAN® N91 NEW

- VPS (Vision Protection System) - short dark shield mounted on the inside of the shell and moving independently from the clear shield. Also available in Light Blue, Smoke and Amber. Easily operated by a slider on the left side of the helmet
- Ready for N-Com® communication system
- Aerodynamic polycarbonate shell with built-in spoiler for improved stability
- Safety dual-action Centromatic release system
- Fully removable and washable Clima Comfort liner with mesh panels for air flow and an extra neck roll for wind-noise reduction
- Reflective panels on the back of the liner and the chin curtain
- Upgraded air delivery system with easy-to-operate top vent, deep air channels along the crown and exhaust grid in the rear spoiler
- Centrally located chinbar vents blow along the inner surface of the faceshield
- Optically correct, push-button quick-change Lexan® faceshield, is treated scratch-resistant and accepts Pinlock® fog-resistant insert
- The P/J slider locks the chinbar in the upper position for additional safety when riding with the helmet open
- Microlock2 (adjustable quick release) retention system
- Sanitized anti-microbial hypoallergenic interior
- Velour chin-strap padding
- Includes: fog-resistant insert, installed wind protector (chin curtain) and user's manual
- Meets or exceeds **D.O.T.** standards

NOLAN® N86 NEW

The N-86 is simply a great full-face helmet at a great price: it is light, packed with features typical of high-end helmets and comes in a wide range of solid colors and graphics.

- Lightweight aerodynamic polycarbonate shell with built-in spoiler for improved stability
- VPS (Vision Protection System) - short dark shield mounted on the inside of the shell and moving independently from the clear shield. It is easily operated by a rotating slider on the left side of the helmet. It is treated to be fog-resistant and scratch-resistant and can be changed easily
- Ready for N-Com® communication system (some graphics are not N-com-ready)
- Fully removable and washable Clima Comfort liner on snaps with wrap-around cheek-pads and neck-roll for wind-noise reduction
- The multicolor liner is treated to be antibacterial, is wicking and breathable
- The cheek-pads are separate for custom-fitting options
- The Eyewear-Adaptive feature accommodates eyeglasses
- Reflective patch on the back neck-roll increases rider safety at night
- Dual top vent with exhaust vent in the rear spoiler and chin-bar vents operate with glove-friendly sliders
- Optically correct, push-button quick-change shield is optically correct
- Multi-position scratch-resistant shield accepts the high-performance Pinlock® fog-resistant insert with a silicone seal
- Chin curtain included
- Microlock2 (adjustable quick release) retention system
- Velour chin-strap padding
- **D.O.T.** approved (In Europe ECE-2205 approved)

NOLAN® N44 NEW

- 6 in 1 design
- Crossover design with quick-change accessories allows for customized looks and functions for every ride. Comes with clear shield, integrated sun shield, peak and the removable chinbar
- GE Lexan® chinbar is EPS lined and attaches to the shell with strong stainless-steel latches; it passes the tests for full-face helmets of the European standard ECE-2205
- Mesh chin curtain has wind-noise reducing air wings (included)
- VPS (Vision Protection System) - Internal scratch-resistant and fog-resistant sunshield is lowered by a slider and retracted instantly by a button
- Faceshield is optically correct and fitted in an exceptionally large eye port
- The black peak (included) can be installed in seconds instead of the clear shield
- Lightweight aerodynamic polycarbonate shell with built-in spoiler for improved stability
- Fully removable and washable Clima Comfort liner is antibacterial, antifungal and wicking. Separate neck roll lowers wind-noise inside the helmet and is removable in summer
- The venting mechanism features the Air-booster system and a Venturi effect-based hot air extractor
- Microlock2 (adjustable quick-release) retention system
- Velour chin-strap padding
- Includes: side covers, chinbar mounting point covers, Pinlock® fog-resistant insert, chin curtain and user's manual
- **D.O.T.** approved (In Europe ECE-2205 approved)

ANSWER EVOLVE NEW

Inspired by our elite athletes around the globe, the progressive designs of the Evolve helmet exemplify what it means to be an evolutionary piece of equipment for an elite athlete. The all-new aerodynamic poly-carbonate shell of the Evolve helmet is exclusive to Answer Racing for 2014.

- Aggressive shell design features multiple oversized front and rear vent ports, allowing more air to circulate around the rider's head for heat management and additional comfort
- Raised eyeport ridge enhances protection by providing improved impact dispersion, absorbing forces from side and frontal impacts
- Single-point adjustable visor design allows for quick and easy height changes
- Custom nose guard and chin vent design provides maximum roost protection and increased air flow
- Removable, washable and replaceable comfort-fit liner and cheek pads utilize quick-dry moisture-wicking fabrics
- Meets or exceeds **Snell 2010**, **D.O.T., ECE, AS and SG** standards.*

*ECE available in Europe, AS available in Australia, SG available in Japan.

ANSWER NOVA NEW

Answer's 2014 line of Nova helmets has the sort of style and engineering typically found on more expensive helmets. With features like a plush removable/washable liner, injection-molded shell with multiple air vents and an adjustable/replaceable visor, this very well may be your lid for 2014.

- Injection molded ABS shell, adjustable visor and goggle pads
- Full EPS liner, including chin bar provides superior protection
- Snap-in liner is removable/washable and made with moisture wicking fabrics
- Multiple front air intakes with rear exhaust venting
- Vibrant graphics with UV clear coat in popular colorways to match any gear
- Meets **D.O.T.** standards

CARDO SCALA RIDER® G9x™ NEW

- Bike-to-Bike intercom range of up to 1 mile*
- "One+8" Intercom - toggle between 9 riders
- 4-Way full duplex intercom conference mode
- Voice Recognition and Voice Command technology for true hands-free operation
- "Flash Pairing" - simply 'bump' two G9s together and you're ready to hit the road!
- Click-to-Link® for spontaneous intercom with scala riders nearby with no need for pre-pairing
- Music-Sharing: Rider and Passenger can listen to the same stereo music (via A2DP)
- Android App for individual scala rider customization (first of its kind!)
- Cardo Community® online social platform allows you to invite friends on a ride, personalize your unit's settings and access software updates
- Group Signal: Send an audio alert to up to 8 other riders in your group simultaneously
- Hot-Dial number (customizable)
- Multiple Connectivity options:

- Dual Handsfree profile to connect 2 Bluetooth-enabled mobile phones
- Mobile Phone Conference Mode (rider, passenger, outside caller)
- Stereo Bluetooth (A2DP) enabled MP3 player / iPod or smartphone to stream wireless music
- Non-Bluetooth audio player (via MP3 cord)
- Receive in-the-ear navigation instructions from Bluetooth enabled GPS (must support HS profile)
- Intercom connectivity to all other compatible scala rider models

- Built-in FM radio with RDS, 6 programmable station presets and smart auto scan
- AGC technology: Self-adjusting speaker volume according to speed and ambient noise (pat. pend. individual adjustability)
- VOX activation: Make and answer phone and intercom calls without taking your hands off the handlebars
- Interchangeable Hybrid and Corded microphones in the same package to suit any helmet
- Replaceable plug-in speakers (3.5mm connection)
- Up to 13 hours talk time, 1 week standby.
- Waterproof and Dustproof unit

NOTE: Results may vary according to terrain. Reduced operational range when connected to certain scala rider models

NOLAN HELMETS

39-3457

NOLAN N-COM® COMPLETE BLUETOOTH® B4 PLUS SYSTEM

B4 Plus Designed for the Nolan N104 Helmets

Specifically designed for simple, seamless installation in the N104 modular helmet. The installation takes a few minutes thanks to the new configuration: the electronics and the slimmer battery fit like a cartridge behind the lower trim in the back of the helmet. The keypad mounts on the left side and is easy to operate with gloved fingers thanks to its raised rubber buttons. The BlueTooth® B4 allows for wireless communications between your helmet and another BlueTooth® device such as your cellular phone, passenger's helmet or a GPS.

Universal Intercom[1]

- N-Com system can be connected to other brand communication systems as a mobile phone
- N-Com system can simultaneously connect to the other brands of communication systems and to a mobile phone
- The bike to bike communication range depends on the bike to bike range of both systems

Voice Prompt[1]

A voice announces:

- The N-Com Menu that has been selected by the user
- The connection to the telephone
- The low battery status
- A function permits users to communicate with 4 additional riders equipped with their own B4, one at a time
- FM Radio with RDS function (to stay tuned to the same radio station for the entire ride), with 6 pre-settings for your favorite radio stations
- Firmware updates as well as presetting of the radio stations, volume controls, etc. can be done by connecting the B4 to a computer via the USB cable (included) with the N-Com Wizard program from their website

DSP - DIGITAL SIGNAL PROCESSING

- Dynamic noise reduction during intercom connection with another helmet
- The DSP technology decreases the background noise captured by the microphone of Helmet 1 and heard in helmet 2 during intercom communication

SWITCHING OFF OF THE AMPLIFIERS

If N-Com system is connected only to the mobile phone and there are any other audio sources active, N-Com system automatically switches off the amplifiers. This feature reduces:

- The power consumption = more battery time
- The white noise of the speaker
- The noise of Bluetooth® data package transmission

USB Wire for B4 to PC Connection/Charger	39-3500	8.95
USB Bike Charger	39-3501	45.95

See N-Com Replacement Parts ON PAGE 108

[1] The feature wil be available on all B4 and Bluetooth® Kit3 systems thanks to the new firmware version 4.0 (download from N-Com Wizard)

WARNING: Due to variability of the network signal, there may be some interference in the wire connections that are not caused by the N-Com system of the wire used. Functions of the Bluetooth® communication system depend on the model of the mobile phone used. Not all Bluetooth® phones enable simultaneously the intercom function with another Bluetooth® helmet and the connection of the mobile phone. The functionality of the intercom kit system with the mobile phone depends on the type of telephone used and the software version installed on it.

NOLAN N-COM® B1 ENTRY LEVEL BLUETOOTH COMMUNICATION SYSTEM

The New B1 system is an entry-level BlueTooth® communication kit, which includes both the headset and the BlueTooth® unit in one easy-to-install system for one or two helmets. It is optimized for one rider or for a couple riding on one motorcycle, as the distance for helmet to helmet communication is limited to 150ft.

- Rider to passenger communication via BlueTooth®
- Other devices can be connected to the B1: Music players and other devices using a standard headphone jack can be connected via a MultiMedia Wire (not included) and other BlueTooth-enabled devices such as a cell-phone and a GPS can be paired through the BlueTooth® connection
- Firmware updates can be done by connecting the B1 to a computer via the USB cable (included) with the NCom Wizard program.

NOLAN N-COM®
BASIC KIT 2/E-BOX
BLUETOOTH® KIT 3 PLUS SYSTEM

Basic Kit 2
- The Basic Kit 2 is required for utilizing the BlueTooth® E-Box 3, E-Box 2.1, E-Box 2. This kit fits the N103, N90, N85 and N43 (all versions)
- Basic Kit 2 includes the speakers, microphone, connecting plates and wires
- As the basis of the system, it is necessary for all N-Com applications
- Can be used with a BlueTooth® E-Box for wireless connection with a passenger or with other devices such as a phone, GPS, etc.
- In the Basic Kit 2, the upgraded speakers make listening to music an enjoyable experience and the rider can choose not to install the microphone if he does not plan to communicate

E-Box Bluetooth® Kit 3 Plus
- BlueTooth® 3 Kit includes the E-Box, battery, battery charger and the seal
- The Bluetooth® Kit 3 Plus is stereo for music when used with the Basic Kit 2 and the rider can control his music source from the helmet (skip song, mute, etc)

Universal Intercom[1]
- N-Com system can be connected to other brand communication systems as a 'mobile phone'.
- N-Com system can simultaneously connect to the other brands of communication systems and to a mobile phone
- The bike to bike communication range depends on the bike to bike range of both systems

Voice Prompt[1]

A voice announces:
- The N-Com Menu that has been selected by the user

J&M® HS-BCD279 HELMET HEADSETS

- These headsets provide the industry's best combination of wind and ambient noise reduction with J&M's standard and high-output AeroMike® III miniature microphones **(HO AeroMike® for use with Harley-Davidson® and Victory® audio systems only)**
- Superior audio fidelity has been achieved with J&M's new large diameter DynaPort®, non-ported and Ultra-slim helmet speakers
- The versatility of J&M's P-series 2-piece cord system allows these headsets to be connected to any factory installed motorcycle audio system ever built, just by interchanging the lower-section hook-up cord

NOTE: Proper acoustical installation is required, exact type will vary depending on application.

J&M® JMCB-2003 CB/STEREO/INTERCOM AUDIO SYSTEM

- Features a 40 channel CB radio, NOAA weather band, rider/passenger intercom
- Stereo music amplification from any Walkman®-type music device
- Mount it to your left handlebar with the proper bracket kit
- The complete system is on your handlebar
- The unit is water resistant so you won't have to worry about getting caught out in the rain
- Audio performance is superb, even at high speeds and that is most impressive considering it's compact size

Note: The JMCB-2003 is a J&M® 6-pin audio system that requires the pre-amplified microphone signal provided by Dual Mode (ECD/ICD/BCD/CD prefixed) helmet headsets along with the #HC-ZJM or #HC-PJM lower-section hook-up cord

J&M® DIGITAL MUSIC MP3/iPOD/AUX PLAYER FOR 2001-2010 GL1800 CD INPUT

These exciting new digital music players from J&M® will plug directly into the CD selected music input plug on all 2001-2010 Honda Gold Wing audio systems, replacing the Honda CD changer, at a fraction of the cost.

- Store and play up to 884 MP3 song tracks from your music library on a single SD card and toggle thru song after song using your existing handlebar audio system controls
- Plug in your iPod® or iPhone® with your favorite music files stored, and toggle through song after song, or playlist after playlist, using your existing handlebar audio system controls, without discharging your iPod's internal battery
- Plug in your remote mounted Satellite radio receiver or MP3 player, using the 3.5mm 3-conductor plug accessory cable and enjoy high-quality stereo music through the Honda audio system CD selection
- All of these possible music sources can be played, while still maintaining all of the normal integrated functions of the GL-1800 audio system, including driver-passenger intercom and CB radio
- Control head mounts down into the base inside the tail trunk, in place of the CD changer, as a complete plug-n-play installation
- This digital music player kit includes a direct plug-n-play harness for the GL-1800 audio system, SD card reader/adapter, USB cable extension for iPod® 3.5mm aux extension cable for satellite radio or MP3 player, pre-loaded 4GB test SD card, pre-gummed Velcro® mounting strips and complete installation and operation instructions.

Important Note: When installing this unit on 2009-2010 GL-1800s, if you wish to use the XM satellite radio feature of your audio system, with this digital music changer, you will need to purchase at additional cost J&M part# JMDM-ADT-GL18.
21-7950 $209.99

J&M® CB HAND MIKE KIT FOR 1988-2013 HONDA® GL-1800 OR GL-1500

This is J&M's new CB hand microphone kit complete for 1988-2013 Honda Gold Wing GL-1800 or GL-1500. Once installed, the included female headset pig-tail jack with dust-cover, will accept either this specific J&M® CB hand mic, OR the standard 5-pin lower cord connection from a J&M®, Honda or other brand compatible helmet headset.
Kit includes:

- High-impact molded noise-cancelling hand microphone, tuned for use at highway speeds
- Custom made black powder coated, stainless steel handlebar mounting bracket and mounting hardware, with heavy-duty mike clip
- Top-quality din jack/plug connectors for extended durability
- Total plug-n-play wiring harnesses compatible with all years of the Honda GL-1800 or GL-1500
- Complete installation/operating instruction

21-7954 $129.99

J&M® DIGITAL MUSIC MP3/iPOD/AUX BLUETOOTH® FOR 2001-2010 GL1800 CD INPUT

Link by Bluetooth® your cell phone or Garmin® Zumo to the player and your cell phone conversations or navigation commands will automatically prioritize OVER whichever music files are being played at the time, allowing hands free cell phone conversations, by both the driver and passenger through their J&M® brand helmet headsets. If your cell phone/smart phone also contains stored stereo music files, they will stream via Bluetooth®, into the music player and on through to the GL-1800 audio system.
